## INSTALLING A SCANNER-DRIVER

**Before starting, turn the scanner machine off and verify it is not plugged into the computer. Also verify you have full administrator rights to your computer. **
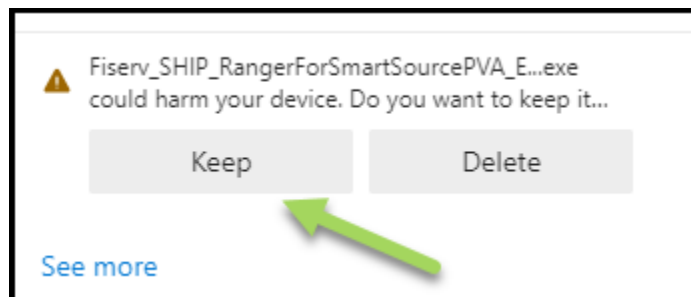

This Installation Guide is only for the SmartSource scanners shown below. Please contact Business Support at 402-473-8542 for assistance with other scanner types.

Click here to download the driver for the scanner. It is also located in the **Drivers and User Guides** section of the Desktop Teller Page by selecting the **Download Driver** tile.
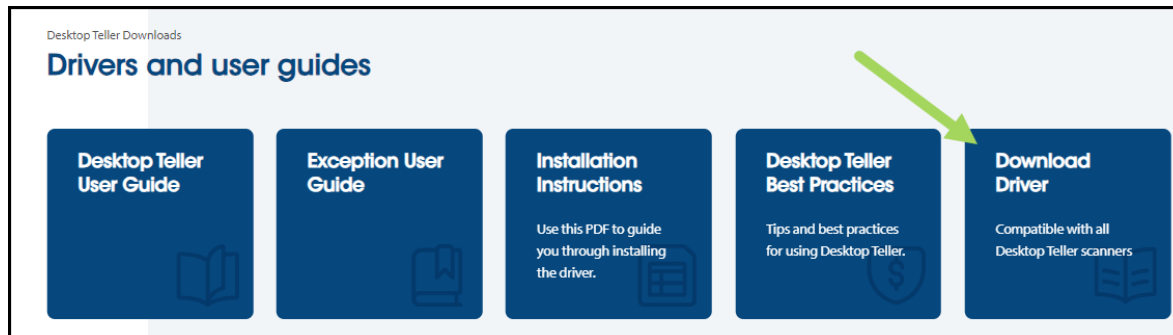

You will see a pop-up like the one Illustrated below; select **Keep**.

Select **Run** on the Security Warning pop-up.

The Fiserv Installation screen will appear. Select **Install**. *Install may take up to 15 minutes*

You must wait until the Installation Completed screen displays before connecting the scanner into the USB port

---

Once the installation is complete, select **Exit** to close.

Close any internet browser window that may be open. Restart the computer. Reconnect the scanner.

The scanner is now ready to make deposits in Chrome, Microsoft Edge, or Firefox

Creating the First Deposit

If the Driver install was recently completed, it is recommended to restart the computer.

Plug the scanner into an available USB port, and verify it is turned on.

Visit our Desktop Teller Page to locate our guides and best practices to assist you in creating deposits.
